DETAILED ACTION

Claims 1-48 are pending in the application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-46, drawn to a process for making a dialkyl carbonate and a diol, classified in class 558, subclass 277.
- II. Claims 47 and 48, drawn to a process for making a polycarbonate, classified in class 558, subclass 265.

The inventions are distinct, each from the other because of the following reasons: the process of Group I and Group II differ in that the process of Group II produce final products (polycarbonate) which are patentably distinct from the final products produced in the process of Group I (dialkyl carbonate).

Because these inventions are distinct for the reasons given above, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper. Therefore, since separate search considerations are involved, it would impose an undue burden on the Examiner and the Patent Office's resources to examine the instant application if unrestricted.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
